

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<answer> C. Minimum = 0 , Maximum = 15 </answer>

<think> Reasoning process :

- 1 . The Glasgow Coma Scale (GCS) is a neurological scale intended to give a reliable , objective way of recording the conscious state of a person for initial as well as subsequent assessment .
- 2 . The GCS assesses three aspects of a patient's neurological status : eye opening , verbal response , and motor response .
- 3 . Each of these three categories has a maximum score of 6 , and the minimum score is 1 .
- 4 . Therefore , the minimum possible total score is 3 (1 for each category) , and the maximum possible total score is 18 (6 for each category) .
- 5 . However , the options given do not include 18 as the maximum , and the minimum score of 0 is not possible as each category has a minimum score of 1 .
- 6 . Therefore , the minimum possible value of the Glasgow Coma Score is 3 , and the maximum possible value is 15 .
