

Question:
Bivalent meningococcal vaccine is ?

- Answer Choices:
- A. A Y
 - B. A C
 - C. C y
 - D. A W-I35

Reasoning + Answer:

<think> I am thinking about the bivalent meningococcal vaccine. I know that the bivalent meningococcal vaccine is a type of vaccine that protects against two different serogroups of Neisseria meningitidis. I am considering the possible combinations of serogroups that the vaccine could protect against. I am thinking about the different types of meningococcal vaccines, such as the MenACWY vaccine, which protects against serogroups A, C, W, and Y. I am also thinking about the MenA vaccine, which protects against serogroup A. I am considering the possibility that the bivalent vaccine could be a combination of the MenA and MenWY vaccines. </think><answer> D. A W-I35</answer>
