

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think> To determine the minimum and maximum possible values of the Glasgow Coma Score (GCS), we need to understand what the GCS is . The GCS is a neurological scale used to assess a patient's level of consciousness after a head injury or other medical condition . It consists of three components : eye opening , verbal response , and motor response . Each component is scored from 1 to 4 or 6 , depending on the level of response . The total GCS score ranges from 3 to 15 . The minimum score is 3 , which indicates a patient who is unresponsive and has no eye opening , no verbal response , and no motor response . The maximum score is 15 , which indicates a patient who is fully awake and has a normal eye opening , a clear verbal response , and a normal motor response . </think><answer> Minimum = 3 , Maximum = 15 </answer>
