

**Question:**  
Bivalent meningococcal vaccine is ?  
Answer Choices:

- A. A Y
- B. A C
- C. C y
- D. A W-I35

**Reasoning + Answer:**

<think> To determine the correct answer , we need to identify the bivalent meningococcal vaccine , which protects against two types of meningococcal bacteria . The bivalent vaccine is typically designed to protect against serogroups A and W - 135 , as it is known to cause meningitis and sepsis </think><answer> A W - 135 </answer>
