

**Question:**

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

**Reasoning + Answer:**

<thought>

To solve this problem , we need to understand the Glasgow Coma Scale ( GCS ). It is a neurological scale used to assess the level of consciousness in a patient . The GCS is based on three components : eye opening , verbal response , and motor response .

</thought>

<answer>

A . Minimum = 3 , Maximum = 15

</answer>

<thought>

The minimum value of the Glasgow Coma Scale is 3 . This corresponds to a patient who shows no eye movement ( no eye opening ) and no verbal or motor response .

The maximum value of the Glasgow Coma Scale is 15 . This corresponds to a patient who opens eyes in response to pain , speaks in full sentences , and follows commands by moving all four limbs .
