

Question:

A 6 year old girl is easily distracted in class and exhibits poor scholastic performance. Seizures are precipitated by hyperventilation. What is the probable diagnosis?

Answer Choices:

- A. Myoclonic seizures
- B. Absence seizures
- C. Atonic seizures
- D. Myoclonia

Reasoning + Answer:

<thought >

To solve this problem , we need to consider the symptoms and the precipitating factor . The girl is easily distracted and has poor scholastic performance , which could suggest attention deficit disorder (ADD). Additionally , her seizures are triggered by hyperventilation , which is a common trigger for absence seizures .

</thought >

<answer >

B . Absence seizures </answer >
