

Question:

Shock causes:

Answer Choices:

- A. Stagnant hypoxia
- B. Anemic hypoxia
- C. Hypoxic hypoxia
- D. Histotoxic hypoxia

Reasoning + Answer:

<think>
Shock leads to a decrease in blood flow and oxygen delivery to tissues , which can result in hypoxia .
The type of hypoxia in this case is hypoxic hypoxia , which is a decrease in oxygen supply to tissues
due to a decrease in blood flow .
</think>
<answer>
C. Hypoxic hypoxia
</answer>
