

Question:

The feedback loop in men which regulates the production of sex hormones includes all but which of the following?

Answer Choices:

- A. follicle-stimulating hormone
- B. oxytocin
- C. pituitary gland
- D. hypothalamus
- E. gonadotropin-releasing hormone
- F. luteinizing hormone
- G. testosterone

Reasoning + Answer:

<think>

The feedback loop in men that regulates the production of sex hormones involves the hypothalamus, pituitary gland, gonadotropin-releasing hormone (GnRH), follicle-stimulating hormone (FSH), and luteinizing hormone (LH). Oxytocin is primarily involved in social bonding and childbirth, not directly in the regulation of sex hormone production.

Therefore, the feedback loop does not include oxytocin as one of its components.
