

Question:
Which of the following factors is associated with a decreased risk of Alzheimer's?

- Answer Choices:
- A. Being African or Hispanic American
 - B. A lower level of education
 - C. Living in a city
 - D. Being married
 - E. Having a family history of Alzheimer's
 - F. High intake of saturated fats
 - G. Older age
 - H. Eating fish
 - I. Being a smoker
 - J. Drinking alcohol regularly

Reasoning + Answer:

<think>

1 . Identify factors that could potentially influence Alzheimer's risk

2 . Consider the relationship between lifestyle and health outcomes

3 . Evaluate the options provided and eliminate those that are unlikely to be associated with a decreased risk of Alzheimer's

4 . Recall studies that have investigated the relationship between lifestyle factors and Alzheimer's risk

5 . Identify the option that is consistently associated with a lower risk of Alzheimer's

6 . Select the correct answer based on the analysis

</think>< answer> H . Eating fish
