

Question:

The feedback loop in men which regulates the production of sex hormones includes all but which of the following?

Answer Choices:

- A. follicle-stimulating hormone
- B. oxytocin
- C. pituitary gland
- D. hypothalamus
- E. gonadotropin-releasing hormone
- F. luteinizing hormone
- G. testosterone

Reasoning + Answer:

<think>

1 . Identify the feedback loop in question : sex hormone production regulation in men

2 . Identify the key components involved in this loop :

- hypothalamus
- pituitary gland
- gonadotropin-releasing hormone (GnRH)
- follicle-stimulating hormone (FSH)
- luteinizing hormone (LH)

3 . Determine which components are directly involved in the feedback loop

- GnRH , FSH , and LH are directly involved in the loop
- Testosterone is a product of the loop , not a regulator
- Oxytocin is involved in social bonding and milk let down , not sex hormone regulation
- Pituitary gland is involved in the loop , but not as a product

4 . Eliminate the components not directly involved in the feedback loop

- testosterone , oxytocin

5 . Choose the correct answer from the remaining options

- The correct answer is testosterone , as it is a product of the sex hormone production , not a regulator
