

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think> At birth , the brain is still developing , and different parts mature at different rates . The brain stem , which controls basic functions such as breathing , heart rate , and blood pressure , is relatively more developed than other parts at birth . In contrast , the cortex , which is responsible for higher -order thinking and cognitive functions , is still maturing . Therefore , the least developed part of the brain at birth is the cortex . </think><answer> G . cortex </answer>
