

Question:

Which of the following factors is associated with a decreased risk of Alzheimer's?

Answer Choices:

- A. Being African or Hispanic American
- B. A lower level of education
- C. Living in a city
- D. Being married
- E. Having a family history of Alzheimer's
- F. High intake of saturated fats
- G. Older age
- H. Eating fish
- I. Being a smoker
- J. Drinking alcohol regularly

Reasoning + Answer:

<think> Being African or Hispanic American , living in a city , having a family history of Alzheimer's , older age , being a smoker , and drinking alcohol regularly are all factors that are associated with an increased risk of Alzheimer's . On the other hand , being married and eating fish are associated with a decreased risk of Alzheimer's . </think>
<answer> D </answer>
