

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think>

- The brain is composed of various parts including the cortex , cere bell um , brain stem , etc .

- At birth , the brain is not fully developed and the brain stem is the first part to develop , followed by the cere bell um and then the cortex .

- The cortex is the last part of the brain to develop and is the most complex and largest part of the brain .

- So , the least developed part of the brain at birth is the cortex .

</think>

<answer>

G . cortex

</answer>
