

Question:

Which of the following factors is associated with a decreased risk of Alzheimer's?

Answer Choices:

- A. Being African or Hispanic American
- B. A lower level of education
- C. Living in a city
- D. Being married
- E. Having a family history of Alzheimer's
- F. High intake of saturated fats
- G. Older age
- H. Eating fish
- I. Being a smoker
- J. Drinking alcohol regularly

Reasoning + Answer:

<think>

- Being African or Hispanic American , having a family history of Alzheimer's , and older age are all risk factors for Alzheimer's .

- Lower education and living in a city are not directly linked to Alzheimer's risk but can be associated with other factors .

- Being married , high intake of saturated fats , smoking , and drinking alcohol are all considered risk factors for Alzheimer's .

- Eating fish is often associated with a lower risk of cognitive decline and Alzheimer's due to its omega-3 content .
