

Question:

At birth, the least developed part of the brain is the

Answer Choices:

- A. visual system
- B. thalamus
- C. frontal lobe
- D. brain stem
- E. parietal lobe
- F. cerebellum
- G. cortex
- H. basal ganglia
- I. hypothalamus
- J. limbic system

Reasoning + Answer:

<think>

- The brain develops from the bottom up and from the back to the front .
- The brain stem is the first part to develop and is crucial for basic life functions .
- The visual system , frontal lobe , cerebellum , cortex , basal ganglia , hypothalamus , and limbic system all develop later in fetal development .
- The thalamus , while an important structure , is not the least developed part of the brain at birth .
- The least developed part would be the one that develops last , which is the visual system in comparison to the brain stem .
