

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

`<think>` He does 3 sprints 3 times so $3 * 3 = 9$. 9 times 60 is $9 * 60 = 540$. So he runs 540 meters a week. `</think>`
`<answer>` 540 `</answer>`
