

Question:

Toulouse has twice as many sheep as Charleston. Charleston has 4 times as many sheep as Seattle. How many sheep do Toulouse, Charleston, and Seattle have together if Seattle has 20 sheep?

Reasoning + Answer:

`<think>` Charleston has 4 times as many as 20 so $4 * 20 = 80$. Toulouse has twice as many as 80 so $2 * 80 = 160$. $80 + 160 + 20 = 260$ so together they have 260. `</think>`
`<answer>` 260 `</answer>`
