

Question:

Carla is downloading a 200 GB file. Normally she can download 2 GB/minute, but 40% of the way through the download, Windows forces a restart to install updates, which takes 20 minutes. Then Carla has to restart the download from the beginning. How long does it take to download the file?

Reasoning + Answer:

`<think>` She downloads 2 gb/min, that is $200 / 2 = 100$ minutes before the restart so then she has 40% of 100 so 40 min, then she has to start over so now its $40 + 20 = 60$ min so $100 + 60 = 160$ min to download the whole thing. `</think>`
`<answer>` 160 `</answer>`
