

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

`<think>` He runs 3 sprints a day so $3 * 3 = 9$, that is 9 a day. In a week is 7 days so $9 * 7 = 63$, so he runs 63 meters a week. `</think>`
`<answer>` 63 `</answer>`
