

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
First, we first find out total number of eggs laid by Janet's ducks in a day ,
16 eggs per day * 1 day = 16 ,
She eats 3 eggs for breakfast ,
So , 16 - 3 = 13 ,
Now , she bakes 4 eggs for her friends ,
So , 13 - 4 = 9 ,
She sells 9 eggs at the market at \$2 per egg ,
So , 9 eggs * 2 = 18 ,
</think> <answer> 18 </answer>
