

Question:

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

Reasoning + Answer:

<think>
First, we first find out total number of eggs laid by Janet's ducks in a day,
16 eggs per day,
After eating 3, she has $16 - 3 = 13$ eggs left,
She sells these 13 eggs at 2 dollars each,
So, total money she makes in a day $= 13 * 2 = 26$,
</think> <answer> 26 </answer>
