

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think> he bought it for 800 00 , then put in 500 00 so it became 800 00 + 500 00 = << 800 00 + 500 00 = 130 000 >> 130 000
this increased by 150 % of 800 00 = 150 / 100 * 800 00 = << 150 / 100 * 800 00 = 120 000 >> 120 000
so it became to original 800 00 + 120 000 = << 800 00 + 120 000 = 200 000 >> 200 000
he bought it for 130 000 , now its worth 200 000 .so he profit 200 000 - 130 000 = << 200 000 - 130 000 = 700 00 >> 700 00
so he profits 700 00
</think>< answer> 700 00 </answer>
