

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think> he buy the for 800 00 , puts 50 , 000 in rep a i r s so its cost s 900 00 .now 150 % of 900 00 = 900 00 * 0 . 15 = 135 00 .so it incre ased in value by 135 00 .so it now cost s 900 00 + 135 00 = 103 500 .so he paid 800 00 + 500 00 = << 800 00 + 500 00 = 130 000 >> 130 000 so he profited 103 500 - 130 000 = << 103 500 - 130 000 = - 264 50 >> 264 50 so h e made - 264 50 so h e made a -profit of 264 50 (prob ably constructed normally in plural Gamma Performs*
