

Question:

Toulouse has twice as many sheep as Charleston. Charleston has 4 times as many sheep as Seattle. How many sheep do Toulouse, Charleston, and Seattle have together if Seattle has 20 sheep?

Reasoning + Answer:

<think> Seattle has 20 sheep , Charleston has 4 times as many sheep as Seattle , so Charleston has $4 * 20 = 80$ sheep , Toulouse has twice as many sheep as Charleston , so Toulouse has $2 * 80 = 160$ sheep , to find the total number of sheep , we add the number of sheep in Toulouse , Charleston , and Seattle , so the total number of sheep is $160 + 80 + 20 = 260$ </think> <answer>260 </answer>
