

Question:

Toulouse has twice as many sheep as Charleston. Charleston has 4 times as many sheep as Seattle. How many sheep do Toulouse, Charleston, and Seattle have together if Seattle has 20 sheep?

Reasoning + Answer:

<think> Charleston has 4 times as many sheep as Seattle, and Seattle has 20 sheep, so the number of sheep in Charleston is $4 * 20 = 80$, Toulouse has twice as many sheep as Charleston, so the number of sheep in Toulouse is $2 * 80 = 160$, to find the total number of sheep in Toulouse, Charleston, and Seattle, we add the number of sheep in all three cities, so the total number of sheep is $20 + 80 + 160 = 360$ </think> <answer> 360 </answer>
