

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>
he runs $3 * 60 = 180$ meters each day
he runs $180 * 3 = 540$ meters each week
</think>
<answer>
540
</answer>
