

Question:

Carla is downloading a 200 GB file. Normally she can download 2 GB/minute, but 40% of the way through the download, Windows forces a restart to install updates, which takes 20 minutes. Then Carla has to restart the download from the beginning. How long does it take to download the file?

Reasoning + Answer:

<think>
she downloads $200 \times 0.4 = 80$ gb in the first time
it takes $80 / 2 = 40$ minutes
she needs 20 minutes to restart
then she downloads 200 gb again
it takes $200 / 2 = 100$ minutes
so the total time is $40 + 20 + 100 = 160$ minutes
</think>
<answer>
160
</answer>
