

Question:

James decides to run 3 sprints 3 times a week. He runs 60 meters each sprint. How many total meters does he run a week?

Reasoning + Answer:

<think>

he runs $3 * 60 = 180$ meters each time

he runs $3 * 180 = 540$ meters each week

so he runs $3 * 540 = 1620$ meters a week

</think>

<answer>

1620

</answer>
