

Question:

Larry loves taking care of animals. He has 3 cats. He has 3 times as many dogs as cats. He has 2 fewer rabbits than dogs. He has a fish tank with three times the number of fish as rabbits. He also has a collection of gerbils that's 1/3 the number of fish he has. How many pets does Larry have?

Reasoning + Answer:

To solve this problem , please follow the steps below :

<think>

1. Larry has 3 cats

2. He has 3 times as many dogs as cats : $3 * 3 = 9$ dogs

3. He has 2 fewer rabbits than dogs : $9 - 2 = 7$ rabbits

4. He has a fish tank with three times the number of fish as rabbits : $7 * 3 = 21$ fish

5. He has a collection of gerbils that's 1/3 the number of fish he has : $21 / 3 = 7$ gerbils

6. Total pets : 3 cats + 9 dogs + 7 rabbits + 21 fish + 7 gerbils = 47 pets

Therefore , Larry has 47 pets.

</think>
