

**Question:**

Janet’s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?

**Reasoning + Answer:**

<think>  
The total number of eggs laid by Janet's ducks per day is 16 eggs <br> She eats 3 eggs for breakfast every morning , so the remaining eggs after eating are  $16 - 3 = 13$  eggs <br> She uses 4 eggs to bake muffins , so the remaining eggs after baking are  $13 - 4 = 9$  eggs <br> So , she sells 9 fresh duck eggs at the farmers ' market every day <br> She sells each fresh egg for \$2 , so she makes  $9 \times 2 = 18$  dollars every day at the farmers ' market <br> </think><answer>18</answer>
