

Question:

Josh decides to try flipping a house. He buys a house for \$80,000 and then puts in \$50,000 in repairs. This increased the value of the house by 150%. How much profit did he make?

Reasoning + Answer:

<think>

the value increased is $80000 * 150 / 100 = 120000$

total value is $80000 + 120000 = 200000$

total cost is $80000 + 50000 = 130000$

profit is $200000 - 130000 = 70000$

</think><answer>70000</answer>
