

Question:

Carla is downloading a 200 GB file. Normally she can download 2 GB/minute, but 40% of the way through the download, Windows forces a restart to install updates, which takes 20 minutes. Then Carla has to restart the download from the beginning. How long does it take to download the file?

Reasoning + Answer:

<think>
the file size is 200 gb
40 percent of 200 is 80
time to download 80 gb is $80 / 2 = 40$
40 minutes
total time is $40 + 20 = 60$
</think><answer> 60 </answer>
