

Question:

Katherine has 5 hanging baskets to fill. In each basket she wants to add 3 petunias and 2 sweet potato vines. The petunias cost \$3.00 apiece and the sweet potato vines cost \$2.50 apiece. How much will she spend filling all 5 hanging baskets?

Reasoning + Answer:

<think>
she wants to add 3 petunias and 2 sweet potato vines in each basket
so in each basket she will spend
 $3 * 3 = \$9$
 $2 * 2.5 = \$5$
so she will spend $9 + 5 = \$14$ in each basket
she has 5 baskets
so she will spend $5 * 14 = \$70$
</think>
