

Question:

Carlos is planting a lemon tree. The tree will cost \$90 to plant. Each year it will grow 7 lemons, which he can sell for \$1.5 each. It costs \$3 a year to water and feed the tree. How many years will it take before he starts earning money on the lemon tree?

Reasoning + Answer:

<think>
Cost to plant = 90. Annual lemon income = $7 * 1.5 = 10$. Annual maintenance cost = 3. Annual net gain = $10 - 3 = 7$. Years to break even $90 / 7 = 12.857 \hat{=} 13$ years.
<answer> 13 </answer>
