

Question:

Carlos is planting a lemon tree. The tree will cost \$90 to plant. Each year it will grow 7 lemons, which he can sell for \$1.5 each. It costs \$3 a year to water and feed the tree. How many years will it take before he starts earning money on the lemon tree?

Reasoning + Answer:

<think>

He grows 7 lemons each year and sells them for \$1.5 each so $7 \times 1.5 = 10$ dollars per year

It costs \$3 a year to water and feed the tree so he earn $10 - 3 = 7$ dollars per year

The tree cost \$90 to plant so it will take $90 / 7 = 12.85$ years

Since we can't have fraction of year it will take 13 years before he starts earning money

</think>

<answer> 13 </answer>
