

Question:

Carlos is planting a lemon tree. The tree will cost \$90 to plant. Each year it will grow 7 lemons, which he can sell for \$1.5 each. It costs \$3 a year to water and feed the tree. How many years will it take before he starts earning money on the lemon tree?

Reasoning + Answer:

<think>
He plants the tree for \$ 9 0
Each year the tree grow 7 lemons and he can sell each lemon for \$ 1 . 5 so $7 \times 1 . 5 = 10 . 5$
It cost \$ 3 a year to water and feed the tree
To cover the cost of planting he need to earn 9 0 dollars
Each year he earn 10 . 5 dollars and spend 3 dollars so he earn $10 . 5 - 3 = 7 . 5$ dollars per year
To earn 9 0 dollars he need $90 / 7 . 5 = 12$ years
</think>
<answer> 12 </answer>
