

Question:

Toula went to the bakery and bought various types of pastries. She bought 3 dozen donuts which cost \$68 per dozen, 2 dozen mini cupcakes which cost \$80 per dozen, and 6 dozen mini cheesecakes for \$55 per dozen. How much was the total cost?

Reasoning + Answer:

Let's break down the problem step by step to determine the total cost of the pastries Toula bought.

1. **Calculate the cost of the donuts:**

- Toula bought 3 dozen donuts.
- The cost per dozen donuts is \$68.
- To find the total cost of the donuts, we multiply the number of dozens by the cost per dozen:

$$3 \text{ dozen} \times 68 \text{ dollars per dozen}$$
$$3 \times 68 = 3 \times (60 + 8) = (3 \times 60) + (3 \times 8) = 180 + 24 = 204$$

Therefore, the total cost of the donuts is:

$$204 \text{ dollars}$$

2. **Calculate the cost of the mini cupcakes:**

- Toula bought 2 dozen mini cupcakes.
- The cost per dozen mini cupcakes is \$80.
- To find the total cost of the mini cupcakes, we multiply the number of dozens by the cost per dozen:

$$2 \text{ dozen} \times 80 \text{ dollars per dozen}$$
$$2 \times 80 = 160$$

Therefore, the total cost of the mini cupcakes is:

$$160 \text{ dollars}$$

3. **Calculate the cost of the mini cheesecakes:**

- Toula bought 6 dozen mini cheesecakes.
- The cost per dozen mini cheesecakes is \$55.
- To find the total cost of the mini cheesecakes, we multiply the number of dozens by the cost per dozen:

$$6 \text{ dozen} \times 55 \text{ dollars per dozen}$$
$$6 \times 55 = 6 \times (50 + 5) = (6 \times 50) + (6 \times 5) = 300 + 30 = 330$$

Therefore, the total cost of the mini cheesecakes is:

$$330 \text{ dollars}$$

4. **Calculate the total cost:**

- To find the total cost of all the pastries, we add the costs of the donuts, mini cupcakes, and mini cheesecakes:

$$204 \text{ dollars} + 160 \text{ dollars} + 330 \text{ dollars}$$

Performing the addition step by step:

$$204 + 160 = 364$$
$$364 + 330 = 694$$

Therefore, the total cost of the pastries is:

<think>
1. Cost of donuts: $3 \times 68 = 204$
2. Cost of mini cupcakes: $2 \times 80 = 160$
3. Cost of mini cheesecakes: $6 \times 55 = 330$
4. Total cost: $204 + 160 + 330 = 694$
</think>

<answer> 694 </answer>
