

Question:

Toula went to the bakery and bought various types of pastries. She bought 3 dozen donuts which cost \$68 per dozen, 2 dozen mini cupcakes which cost \$80 per dozen, and 6 dozen mini cheesecakes for \$55 per dozen. How much was the total cost?

Reasoning + Answer:

Let's break down the problem step by step to determine the total cost of the pastries Toula bought.

1. **Calculate the cost of the donuts :**

- Toula bought 3 dozen donuts .

- The cost per dozen donuts is \$ 68 .

- To find the total cost of the donuts , we multiply the number of dozens by the cost per dozen :

$$3 \times 68$$

- Let's perform the multiplication :

$$3 \times 68 = 3 \times (60 + 8) = (3 \times 60) + (3 \times 8)$$

- First , calculate (3×60) :

$$3 \times 60 = 180$$

- Next , calculate (3×8) :

$$3 \times 8 = 24$$

- Add the two results together :

$$180 + 24 = 204$$

- Therefore , the total cost of the donuts is :

$$204$$

2. **Calculate the cost of the mini cupcakes :**

- Toula bought 2 dozen mini cupcakes .

- The cost per dozen mini cupcakes is \$ 80 .

- To find the total cost of the mini cupcakes , we multiply the number of dozens by the cost per dozen :

$$2 \times 80$$

- Let's perform the multiplication :

$$2 \times 80 = 160$$

- Therefore , the total cost of the mini cupcakes is :

$$160$$

3. **Calculate the cost of the mini cheesecakes :**

- Toula bought 6 dozen mini cheesecakes .

- The cost per dozen mini cheesecakes is \$ 55 .

- To find the total cost of the mini cheesecakes , we multiply the number of dozens by the cost per dozen :

$$6 \times 55$$

- Let's perform the multiplication :

$$6 \times 55 = 6 \times (50 + 5) = (6 \times 50) + (6 \times 5)$$

- First , calculate (6×50) :

$$6 \times 50 = 300$$

- Next , calculate (6×5) :

$$6 \times 5 = 30$$

- Add the two results together :

$$300 + 30 = 330$$

- Therefore , the total cost of the mini cheesecakes is :

$$330$$

4. **Calculate the total cost of all the pastries :**

- We need to add the costs of the donuts , mini cupcakes , and mini cheesecakes :

$$204 + 160 + 330$$

- Let's perform the addition step by step :

$$204 + 160 = 364$$

- Now , add the result to the cost of the mini cheesecakes :

$$364 + 330$$

- Let's perform this addition :

$$364 + 330 = 364 + (300 + 30) = (364 + 300) +$$
