

Question:

Carla is downloading a 200 GB file. Normally she can download 2 GB/minute, but 40% of the way through the download, Windows forces a restart to install updates, which takes 20 minutes. Then Carla has to restart the download from the beginning. How long does it take to download the file?

Reasoning + Answer:

Let's solve this problem step-by-step :

<think>

40% of 200 GB = $0.4 \times 200 = 80$ GB

Time to download 80 GB : $80 \div 2 = 40$ min

Time to reinstall updates : 20 min

100% of file = 200 GB

Time to download 200 GB : $200 \div 2 = 100$ min

Total time = $40 + 20 + 100 = 160$ min

</think><answer>160</answer>
