

Question:

Carla is downloading a 200 GB file. Normally she can download 2 GB/minute, but 40% of the way through the download, Windows forces a restart to install updates, which takes 20 minutes. Then Carla has to restart the download from the beginning. How long does it take to download the file?

Reasoning + Answer:

Let's solve this problem step-by-step :
<think>
200 GB total
40% through : $200 \times 40\% = 80$ GB
 $80 \div 2 = 40$ min to download 80 GB
Restart takes 20 min
Rest to download : $200 - 80 = 120$ GB
 $120 \div 2 = 60$ min to download rest
Total time = $40 + 20 + 60 = 120$ min
</think><answer>120</answer>
