

Question:

Verocay bodies are seen in

Answer Choices:

- A. Meningioma
- B. Hemangioma
- C. Glioma
- D. Shwannoma

Reasoning + Answer:

<think> The assistant is thinking about the fact that Verocay bodies are a type of histopathological feature that is often associated with certain types of tumors. They are characterized by a pattern of cellular arrangement that is often seen in neurogenic tumors, such as schwannomas. The assistant is also thinking about the fact that schwannomas are a type of tumor that is caused by the abnormal growth of schwann cells, which are a type of cell that is found in the nervous system. The assistant is considering the fact that Verocay bodies are a common feature of schwannomas, and are often used as a diagnostic criterion for this type of tumor. </think><answer> D. Shwannoma </answer>
