

Question:

What are the minimum and maximum possible values of Glasgow Coma Score?

Answer Choices:

- A. Minimum = 3, Maximum = 15
- B. Minimum = 0, Maximum = 13
- C. Minimum = 0, Maximum = 15
- D. Minimum = 3, Maximum = 18

Reasoning + Answer:

<think> The assistant is thinking about the fact that the Glasgow Coma Score is a widely used scale that is used to assess the level of consciousness of a person . It is a complex scale that takes into account a variety of factors , such as the person 's ability to open their eyes , respond to verbal commands , and follow commands . The score is typically calculated by adding up the scores for each of these factors , and the resulting score can range from 0 to 15 . The assistant is also thinking about the fact that the Glasgow Coma Score is a sensitive scale that can be affected by a variety of factors , such as the person 's age , sex , and medical condition . The assistant is considering the fact that the scale may be used in a variety of settings , such as in the hospital , and that it may be used to monitor the progress of a person over time . </think><answer> C . Minimum = 0 , Maximum = 15 </answer>
