

Question:

Shock causes:

Answer Choices:

- A. Stagnant hypoxia
- B. Anemic hypoxia
- C. Hypoxic hypoxia
- D. Histotoxic hypoxia

Reasoning + Answer:

<think> The assistant is thinking about the fact that shock can be caused by a variety of factors, such as trauma, infection, and cardiovascular disease. Shock can also be caused by a variety of mechanisms, such as hypoxia, which is a lack of oxygen, and histotoxicity, which is a poisoning of the tissues. The assistant is considering the fact that shock can be caused by a variety of factors, and that the causes of shock can be classified into different categories, such as hypoxic hypoxia, anemic hypoxia, and histotoxic hypoxia. The assistant is also considering the fact that the causes of shock can be caused by a variety of factors, such as trauma, infection, and cardiovascular disease. </think>
><answer> C. Hypoxic hypoxia </answer>
