

Question:

A mental health volunteer is interviewing locals as part of a community outreach program. A 46-year-old man discloses that he has felt sad for as long as he can remember. He feels as though his life is cursed and if something terrible can happen to him, it usually will. He has difficulty making decisions and feels hopeless. He also feels that he has had worsening suicidal ideations, guilt from past problems, energy, and concentration over the past 2 weeks. He is otherwise getting enough sleep and able to hold a job. Which of the following statement best describes this patient's condition?

Answer Choices:

- A. The patient is at risk for double depression.
- B. The patient may have symptoms of mania or psychosis.
- C. The patient is likely to show anhedonia.
- D. The patient likely has paranoid personality disorder.

Reasoning + Answer:

<think>
the patient says that life is cursed so he can be a candidate for depressive paranoia . double depression is when a person has depression along with bipolar disorder . mania can cause delusion so itâGLs not mania but paranoid where the person feels a certain way . anhedonia is not talked about in the ques iton
</think>
<answer>
A . The patient is at risk for double depression </answer>
