

Question:

Shock causes:

Answer Choices:

- A. Stagnant hypoxia
- B. Anemic hypoxia
- C. Hypoxic hypoxia
- D. Histotoxic hypoxia

Reasoning + Answer:

<think> Shock causes a rapid and severe reduction in blood flow and oxygen delivery to the body's tissues, which leads to a lack of oxygen at the tissue level and is characterized by stagnant or insufficient oxygen supply despite a normal oxygen pressure in the blood, which is a form of hypoxia known as stagnant or hypostatic hypoxia.</think>
<answer> A. Stagnant hypoxia </answer>
