

Question:

Dexter has five pigs. Each one eats 4 pounds of feed, twice a day. If Dexter ordered 300 pounds of feed, how many pounds of feed is left after a week?

Reasoning + Answer:

`<think>`He has 5 pigs and each eats $4 * 2 = 8$ so $5 * 8 = 40$ pounds a day. $40 * 7 = 280$,
so after a week $300 - 280 = 20$. The feed left is 20 pounds. `</think>``<answer>` 20 `</answer>`
