

Question:

Skyler has 100 hats on his hand with the colors red, blue, and white. Half of the hats are red, 3/5 of the remaining hats are blue, and the rest are white. How many white hats does Skyler have?

Reasoning + Answer:

<think> Skyler has 100 hats. Now, half of the hats are red. So, number of red hats = $100 / 2 = 50$. Remaining hats after removing red hats = $100 - 50 = 50$. Now, 3/5 of the remaining hats are blue. So, number of blue hats = $(3 / 5) * 50 = 30$. Number of blue and red hats together = $50 + 30 = 80$. So, remaining hats which are white = Total hats - (blue and red hats) = $100 - 80 = 20$. Therefore, Skyler has 20 white hats. </think><answer>20</answer>
