

Question:

Betsy and Donovan made a meal together. Betsy's part took 18 minutes longer than Donovan's part. The meal was made in 98 minutes. How many minutes long was Betsy's part?

Reasoning + Answer:

<think> First, I will represent Betsy's part as x , So, Donovan's part will be $(x - 18)$, combined their parts will be equal to 98 minutes, so, I will create an equation: $x + (x - 18) = 98$, now, I will solve for x , $2x - 18 = 98$, $2x = 98 + 18$, $2x = 116$, $x = 116 / 2$, $x = 58$, </think> <answer> 58 </answer>
