

Question:

Dennis uses 1 pound of butter for every dozen croissants that he makes. He needs to make 6 dozen croissants. The grocery store currently has a promotion for buy one pound of butter get one half off. If the butter costs \$4.00 a pound, how much will it cost him to purchase 6 pounds of butter?

Reasoning + Answer:

<think>he need to make 6 dozen croissants, and he uses 1 pound of butter for every dozen croissants, so he needs 6 pounds of butter, the grocery store has a promotion for buy one pound of butter get one half off, so the price of 1 pound of butter is $4 / 2 = 2$ dollars, now he needs 6 pounds of butter, so the cost of 6 pounds of butter would be $6 * 2 = 12$ dollars</think><answer>12</answer>
