

Question:

Theo has \$6000 he wishes to spend on his upcoming business trip to South Africa. He buys 6 business suits at \$100 each, 3 suitcases at \$50 each, a flight ticket that costs \$700 more than 5 times as much as the cost of a business suit. He wishes to save \$2000 for this trip, how much does he have to spend on buying gifts for his business partners in South Africa?

Reasoning + Answer:

<think>hespends $6 * 100 = 600$ onsuits hespends $3 * 50 = 150$ onsuitcases theflightticket costs $5 * 100 + 700 = 900$ hespends $600 + 150 + 900 = 1750$ hewantstosave 2000 sohe has $2000 - 1750 = 250$ tospendongifts </think><answer>250</answer>
